You Need a Tonic

There are times in every woman's life when she needs a tonic to help her over the hard places. When that time comes to you, you know what tonic to take—Cardui, the woman's tonic. Cardui is composed of purely vegetable ingredients, which act gently, yet surely, on the weakened womanly organs, and helps build them back to strength and health. It has benefited thousands and thousands of weak, ailing women in its past half century of wonderful success, and it will do the same for you.

You can't make a mistake in taking

CARDUI

The Woman's Tonic

Miss Amelia Wilson, R. F. D. No. 4, Alma, Ark., says: "I think Cardui is the greatest medicine on earth, for women. Before I began to take Cardui, I was so weak and nervous, and had such awful dizzy spells and a poor appetite. Now I feel as well and as strong as I ever did, and can eat most anything." Begin taking Cardui today. Sold by all dealers.

Has Helped Thousands.

H. L. Morrison, Mayor

Pouring Houses to Be Great Sport.

Pouring houses, not pouring tea, is going to be the great sport of women's clubs in the next decade, according to Mrs. Isa Maud Isen, lecturer and only woman representative of Thomas A. Edison. And a pleasant time the guests are going to have," she said. "All they'll have to do is sit and watch a porch drip out here, a geegaw decoration there, or criticize the size of the refrigerator or the funny little window in the den. It won't take more than an hour." Mrs. Isen is proud of the fact that she is the only woman representative of the "Wizard." She admits there are 5,000 men who act for him, but that does not diminish her glory.

When Speed Becomes Dangerous.

Mrs. Rose Pastor Stokes, speaking at the first annual conference of the American Museum of Safety in New York, says that speed is the real problem of labor. It is not that machinery is so dangerous, she says, but what is called industrial efficiency keeps the workers up to a pitch that means in time mental and physical exhaustion. She says that up to a certain point a worker can increase speed, and that after that it begins to decline. Business compels the attitude of the owners of factories, she says, and they do not realize how they grind down the girls in their seeking for efficiency.

Motion Retarded.

Intoxicated Party—"Off'ar, will you be kind nuff to blindfold me so I can't see those 'Stop, look and listen' signs on the telegraph poles? It's taken me half an hour to walk two blocks tryin' to co-operate in this safety business."—Buffalo Express.

BABY SHOWS IN THE CONGO LAND

Missionaries are Teaching African Mothers how to Rear Better Boys and Girls.

The attention of the whole civilized world has recently been directed to the efforts being made to raise "better babies," and it is interesting to know that efforts of this kind are now being made in the Congo to check the appalling rate of infant mortality.

Miss Margaret Van Leancourt, trained nurse of the Belgian Evangelical society, says:

"Many causes have contributed to this depopulation, for we are led to believe that the country once had an enormous population before the demoralizing effects of an unchristian civilization entered it.

"Undoubtedly the ignorance of the mothers should be mentioned as one of the primary causes, yet even this cannot be responsible for such a terrible death rate as exists here."

Miss Leancourt mentions alcohol

and the prevalence of sleeping sickness as contributing causes of the terrible death rate among the babies in the Congo. She continues:

"A committee has been formed in Belgium which has undertaken the work of reformation in the colony and they are devoting their best efforts to improve the moral conditions of the natives. This committee has at its head, Madam Vanderpeere, a woman of common sense and sound judgment who has given herself with untiring zeal to the alleviation of distress among the poorer classes of Brussels. This committee has received the sanction and approval of the government and has received very substantial support from the authorities.

(Father of well known native Presbyterian missionary in Africa. This man recently walked 100 miles to hear his son preach.)

"It is needless to say that the Protestant societies with their doctors, trained nurses and hospitals can be of invaluable assistance in carrying out the plans and purposes of this committee and thus enable our country to appreciate more fully the real value of the Protestant missions in the advancement of civilization. We have better means at our disposal and the members of our missions are more capable of accomplishing the desired result of the movement and let us hope that they may soon take full advantage of this excellent opportunity.

"Every station should have a 'Baby Show' at least once a week where the little ones can be weighed and examined and advice should be given to the mothers concerning the care of their children and all other such subjects which are absolutely new to them.

"But opportunity is given to us all as missionaries to be in constant touch with the native women who are far less teachable than the men because they hold more tenaciously to their old customs and superstitions. But I know that they are very sensitive to kind treatment and when they are treated as human beings they become astonishingly near to us and permit us to become guardians with them of that which is dearest to them, their children."

FACTS THAT COUNT.

"The Methodist Episcopal church, South, has 3,000 Indian members, 122 Indian local preachers, 70 Indian preachers in active service, and three white preachers who give all their time to the Indians. The work is among the Nez Percés, Kiowas, Choctaws, Chickasaws, Cherokees and the Creek tribes. It is said that there are 54,000 Indians without religious instruction and 24,000 Indian children of school age, who do not go to school."

Don't Make Curiosity Telephone Calls

"Because 2,000 late curiosity seekers in Birmingham asked 'Central' where the fire was, an emergency call for an ambulance was held up for nearly 15 minutes and this delay resulted in the death of—". Physicians say that had the ambulance been secured at once—'s life might have been saved."

—Elmira Advertiser.

IT is beyond the bounds of possibility to answer promptly the mass of curiosity telephone calls that threaten to swamp our exchanges every time there is a large fire.

Calls for physicians, the ambulance or the police, held up at such times might result in the loss of human life.

For your protection, as well as for the protection of your neighbors, we ask you not to call the telephone operator merely out of curiosity. After all, she has no more information than you have.
